

I Have a Mansion in the Post-apocalyptic World Comics Novel Chapter 6 To 10

Chapter 6

Gray cement road is full of turtle cracks, unknown plants grow tenaciously in the cracks of cement pavement, bathing in the unhealthy color of the sun.

Almost none of the surrounding buildings had windows in good condition, and the glass had been shattered in the nuclear explosion. The streets are full of abandoned cars, and from the cracked but unbroken windows, it seems that the quality of the window glass is slightly better than that of the window glass.

The streets are still trying to see streamlined "iron boxes.". According to sun Jiao, it is a slow descent device used by NATO's orbital airborne troops. However, when it comes to the history of the city's invasion, sun Jiao's face does not show any superfluous emotions. This may have something to do with her being born in a sanctuary and having no idea of the so-called state.

However, her face still showed an unabashed boredom when it came to the war of the "predecessors".

In her opinion, either side of the war was stupid.

"Is it going to rain?" Jiang Chen looked up at the sky. There were thick black clouds. It seems that it is after these dark clouds that the sun appears unnatural. There is a depressing yellow green in the sun. I don't know how these plants grow.

"It's not a cloud. It's radioactive dust." Sun Jiao can't help but feel a little funny, this Jiang Chen is just like when she just came out of 071 refuge.

"That is to say, we are now exposed to radiation without protection?" Jiang Chen smiles bitterly. The only thing he knew about radiation was the Fukushima nuclear power plant accident, and he remembers that there was a time when the supermarket was robbed of salt.

Although it is an act of ignorance, it can be imagined that for people in a harmonious society, radiation is a kind of terrible existence.

However, sun Jiao was used to it. She did not put the sword of Damocles hanging on her head in her heart.

"Don't worry, as long as your EP iodine is not exhausted, the radiation value will not exceed the threshold value, and you don't need to worry about growing a third hand. Of course, it is better to wear radiation protective clothing when crossing high radiation areas such as nuclear power plants or former government agencies." Sun Jiao teased Jiang Chen and continued to lead him in front.

www.onlinefreenovels.com

Although she had experienced a night's passion, sun Jiao did not show any discomfort. However, Jiang Chen's legs and stomach were a little soft...

this is not to say that Jiang Chen can't do it, but how strong his physical strength is, as a modern man, she can't be stronger than the female soldier who walks in the waste soil all the year round.

That terrible muscle strength data...

Jiang Chen can't imagine that this woman with no muscle lines is stronger than a man who looks more or less or has some muscles.

It was Sun Jiao's idea that they went out together.

...

"since you have said you want to help me, you have to learn something about fighting. Come with me tomorrow. At least you have to learn to shoot and protect yourself

"Well, actually, I think I can be a logistics man or something...

" don't be wordy... Tomorrow we'll go to the survivor's camp on the sixth block. It's too dangerous that you haven't even been vaccinated against infection. You have to go there yourself

As a result, Jiang Chen had to take over the rifle from sun Jiao and follow her on the road.

Along the way, two people chatted from time to time, but somehow, sun Jiao did not ask Jiang Chen about her secret. Since she did not ask, Jiang Chen naturally did not take the initiative to mention it. However, Jiang Chen can see that sun Jiao didn't ask, not because she was no longer curious, but because of an indescribable trust.

One day, you will tell me...

the unspoken words can be detected.

For the same reason, Jiang Chen did not inquire what sun Jiao said "must do".

...

"the front will pass through a zombie infested area. The best place to hone your gun skills is the battlefield. You should familiarize yourself with the weapons, but don't fire casually." Sun Jiao said, also took out a streamline

rifle from the back.

Facing Jiang Chen's curious sight, sun Jiao smiles and explains.

"Sk10 Sirius, medium and short range laser rifle, laser gun is the best choice for zombies and other creatures. Low noise, high accuracy. But in order to familiarize you with shooting, you'd better start with kinetic energy weapons. "

With that, sun Jiao pointed to the rifle Jiang Chen Tuo held in his hand and continued to say.

"Pk200 assault rifle, caliber 7.62mm. Although the accuracy of this kinetic energy weapon is not comparable to that of laser weapon, its power and reliability are not comparable to that of laser weapon. You don't need to fix it even if you hit people with the butt of your gun. The safety is on the right side above the handle. Be sure to close it when you don't fire. "

The streamlined short and wide gun body feels a bit futuristic. At the handle, Jiang Chen sees a small mark.

PAC (Pan Asian Cooperation Organization).

They walked in the empty street one after another, and the half man high rat that occasionally ran by the road would scare him, but he didn't feel strange after a long time. These mutants are everywhere. Jiang Chen even saw a cockroach the size of a wolf dog, waving its one meter long tentacles at them and then darting into the shadow of the street. The dense cilia are disgusting."Not all creatures are aggressive. Mice, for example, are physically afraid of humans despite their large size. Although cockroaches look terrible, they don't take the initiative to attack living things because of their feeding habits... "As they get closer to the street crossing, sun Jiao

gradually raises the muzzle of the gun and begins to warn," zombies will stop their activities during the day, and the mutants attached to their brains need stable environment for photosynthesis. It's amazing. That's why these zombies have been starving for so many years. It is said that some zombies in the urban area have even evolved the function of asexual reproduction, ha ha."

Sun Jiao skin smile flesh not smile ground ha ha ha two words, still maintain the alert posture, continue to open mouth to say.

"We need to pay attention to carnivorous creatures. They usually feed on zombies or other low-level mutants, but if they encounter humans, they will never pick their food... And humans, if someone is aiming at your head, don't hesitate to fire."

Sun Jiao's tone without hesitation made Jiang Chen feel a chill.

Surprised at the cruelty of this wasteland, Jiang Chen can not help feeling that the city has formed a complex and alternative ecosystem. Nature is indeed a magical thing. No matter what you give it, it can make it stable in a reasonable way - the survival of the fittest.

Under the tall buildings, there is no civilization, only barbarism. Although holding the crystallization of civilization and technology, Jiang Chen has no sense of security at the moment.

"Shh." Sun Jiao suddenly stopped and raised her right fist to signal Jiang Chen to stop.

"Don't point a gun at me, you fool. Watch my back." Sun Jiao murmured to Jiang Chen.

Jiang Chen took a deep breath with a bitter smile, then opened the insurance and aimed the muzzle of the gun on the quiet street behind.

"It's not normal. All the mutants around have disappeared. I'm afraid we've noticed that the natural enemies are approaching..." Sun Jiao's voice also brings a trace of tension, which makes Jiang Chen's heart start to tense up.

"Natural enemies?"

"Predators and things like that... I hope it's not dead claws."

Although I don't know what the dead claw in sun Jiao's mouth is, Jiang Chen also reads out some bad feelings from her tone.

Just then, there was a loud explosion in the distance of the street. With a heavy and high roar, the sound of a fierce firefight followed.

"Fight ahead, follow me." When sun Jiao heard the commotion in the distance, she didn't retreat. Instead, she began to move towards the battlefield with her rifle in her hand.

"I said," are you going in the wrong direction? "

However, sun Jiao didn't answer Jiang Chen's question. Jiang Chen sighed and had to run to keep up.

"Roar, ooh, ooh..." the ugly and vicious face twisted, saliva splashed from the mouth like rain, waving the broken street lamp on the hand, the fat sebum was almost overflowing.

...

"keep your fire and throw the explosives! Come on

"Ammunition! I need ammunition! "

"Ah, ah! My hand... "The roaring door peeled off an unfortunate man's arm and inserted it into the wall behind him.

The monsters unleash their power, roaring and moving towards the human line of defense.

The soldiers with mixed equipment were venting their fire fiercely at the monster, trying to suppress the fleshy mass. Several soldiers, with their heads buried, ran quickly through the fire net of their teammates, dodging the debris thrown by the monster, and throwing the explosives in their hands at the fat meat.

"... it's meat mountain!" Turning around the corner, sun Jiao's face was full of shock, "how could this thing appear in..."

www.onlinefreenovels.com

the expression on Jiang Chen's face was more wonderful. He opened his mouth wide and fell into a complete stupor.

What is NIMA? Butcher in Wo mountain? But this NIMA is too big!

The meat hill was moving forward in a shower of bullets, and the situation of the soldiers looked rather bad.

The barrage of bullets had an impact on meat mountain, but it was far from enough to stop him. At a loss what to do with the power of the gel, thick fat is like a gel, which is trapped in the bullet that pierced his skin. Although the leader of the group decisively ordered some people to approach and throw explosives at the meat mountain, the effect of the thick fat is obviously not

only bulletproof...

however, although the attack did not work, it was not meaningless. At least, the meat mountain was restrained by the fierce firepower of raindrops and could not advance to the position of human side.

At this time, the shrill sound of breaking through the air suddenly crossed the sky of the human defense line, and the shell dragged the yellow light to the meat mountain.

However, the shell failed to hit meat hill. It almost slipped by the fat face of meat hill and hit the building behind him.

Boom!

Along with the violent explosion, the reinforced concrete wall was blown apart, leaving a terrible hole.

As if aware of the danger, meat mountain all over the body of the fat are shaking violently, the whole body burst out of power is also more violent, that open mouth seems to be ready to send out an angry roar again. However, the roar will not be heard in the future.

Another shell cut through the battlefield, and under the trajectory correction after the first tracer bullet, the shell smashed into the bloody mouth.

Without any suspense, scarlet blood, dark green brain, yellow and white fat almost spilled half the street.

Meat hill, who lost his skull, fell to the ground in the cheers of victory, making a heavy muffled sound.

After the battle, the soldiers came out of the shelter, cheered and hugged their comrades in arms and helped up the wounded. Everything was very organized.

"Type 99 anti tank gun, it is estimated that only this kind of thing can kill meat hill. Meat mountain fat is very thick, almost the killer of all individual weapons, and its bad habit of throwing things is a nightmare Sun Jiao seemed to be relieved to say.

"... what are they doing?" Endure the churning of gastric juice, Jiang Chen takes aim at the man who is busy living on the corpse of meat mountain and asks.

"Collect the subcrystals. In addition, meat mountain fat can be used as fertilizer, or as a source of organic matter and phospholipids in nutrient mixtures. By the way, I remember that its blood cells can also be used as raw materials for many vaccines

Nutrient mixture? Why does it sound like food?

Jiang Chen shivered and vowed that he would never touch the nutritive mixture in his life. Isn't his mother's equivalent to eating meat from meat mountain?

As if she guessed that Jiang Chen was disgusting, sun Jiao grinned and took Jiang Chen to the soldiers.

Aware of the two people's approach, a soldier came over, holding his rifle, looked up and down at the next two people, and then spoke professionally.

"Welcome to sixth block, man. As usual, I need to check your genetic code."

Gene code, a kind of code that compiles gene sequence according to specific algorithm, as the user name of EP. Because of the wide use of EP and the uniqueness of gene code, EP is usually used as something like ID card number. After all, there is no Civil Affairs Bureau in the end of the world. If you want to prove that you are you, you can only speak with DNA.

Many survivors' camps with order will check their genetic code before they are allowed to enter. The main purpose is to arrest those who have violated the law in the camp.

After showing the EP on his arm, the militia politely released them.

"I always thought this wasteland was full of barbarism... Didn't expect to see civilization?" For these armed soldiers did not do any unnecessary harassment to the two people, Jiang Chen's hanging heart is also gradually put down.

However, for Jiang Chen's speech, sun Jiao just laughs playfully.

"Oh? I have the opposite opinion with you. I think there are so-called "civilizations" all over the wasteland, but in a special form. "

The steel gate opened slowly, and the security of the camp was lifted with the fall of meat mountain. Behind the sandbag at the door, Jiang Chen saw the anti tank gun that destroyed meat hill. The ferocious gun barrel sent out a sense of cold, lying on the ground is the thigh like thick metal shell.

To get out of the way for the truck entering the camp, Jiang Chen follows sun Jiao into the inside of the camp.

This order, which exists in chaos, the sixth block, is like a harbor for tourists on the waste soil. However, it would be naive to think of it as the

embodiment of justice.

Chapter 7

Civilization is the spiritual wealth, invention and creation that has been precipitated from history and is beneficial to enhance human's adaptation and cognition of the objective world, in line with human spiritual pursuit, and can be recognized and accepted by the vast majority of people.

So, civilization does exist here.

It's just malformed.

If you use one word to summarize the technology level of the sixth block, it is a mixture of good and bad. You can see mercenaries with rifles on their waists in a daze with cigarettes in their mouths at recruitment sites, and traders who use holographic computers to count goods. It is not uncommon for people who lack arms and legs. Some of them are walking on crutches, while others are walking on mechanical prostheses that are more agile than real legs.

www.onlinefreenovels.com

If you use one word to summarize the people's livelihood level of the sixth block... It is also mixed.

Skinny men and women are everywhere, and people have no strength to howl because of hunger. Soldiers in uniform patrol the streets in groups of three, armed with guns. They ignore the starving people, but also ignore the demand for customers in the street.

Like machines, the expression on their faces can't be seen behind dark sunglasses.

"Absolute neutrality, that's what sixth block stands for on this piece of waste. The law here is very simple. Murder and theft will be killed, transactions

without tax will be expelled, and malicious harm will be jailed. " Sun Jiao explained to Jiang Chen, who was not used to it.

"Then why wasn't that man killed?" Jiang Chen swallowed his spit and watched with disbelief that a man in uniform killed a hungry woman who had no strength to resist with a wooden stick. It seems to be aware of Jiang Chen's line of sight, and the man grinned to Jiang Chen with a friendly smile.

"That's the inspector, dealing with the dead bodies in the slums." Sun Jiao used to reply with a tone of habitual, but Jiang Chen can feel that she does not like here.

The woman is still alive...

"the inner circle of the sixth block will be cleaner, but if you enter, you will have to pay a little bit of sub crystal. We're here just to trade something useful, so it's enough in the peripheral market. " Sun Jiao digs the subject.

"Jiang Chen nodded in silence.

This twisted civilization.

The external market is also messy, but it is much better than the situation in the slums. If the thieves don't "stir up" the crops, they will be "killed" by the thieves in the field.

Some of the more famous "thieves" were painted with formalin and nailed on the board.

"- Rogge jelson, nicknamed the wolf with claws. Three murders on the sixth block, killed in a sewer by the security forces. "

On a closer look, the identity of the dead is also inscribed on the wooden plaque.

The name looks like a foreigner, but that's not surprising. NATO troops have landed in this city, and many people have stayed here.

At the gate of the market, two well-dressed businessmen haggled fiercely. At last, it seemed that they had reached a consensus and signed their names on an agreement. Under the notarization of the market management, one party took out the sub crystal and put it on the energy meter, while the other party moved out ten women with only strands from the rented tent.

Yeah, it's moving out.

And each woman's eyes were pulled from the white lock on her neck.

Those women's looks are pretty good, white skin is almost as good as inflatable dolls, but the cheek is tattooed with a bar code that will only appear.

Seems to be satisfied with the "goods", the merchant who paid for the crystal ordered his men to load these women into the truck and drove away from the market.

"Xinrui hotel." Squinting at the direction of the truck leaving, sun Jiao said slowly.

Jiang Chen noticed that sun Jiao's hands had become fists unconsciously.

"Hotel?"

"It's just a warehouse." Sun Jiao spat softly, "for the check-in to provide a full range of 'service', what is the specific service you know. After all, there is a kind of abnormal human desire. In the pub in Liuding Town, I once heard a guy who was not very smart. In the sharp Hotel, how tender the girl's meat

is... In the sense of food. "

Jiang Chen shivered. He seemed to be able to imagine what kind of hell those expressionless girls would face.

"The human trafficker is supposed to belong to the forces that occupy refuge 101. The low-cost cloning of human beings is produced by cloning techniques and culture medium feeding devices. The human beings produced by these technologies are not so much human beings as commodities. "

"So what the hell is a shelter?" Jiang Chen looked at Sun Jiao's eyes which had no emotional fluctuation with disbelief, and asked with difficulty.

"It's a fantastic thing. Each shelter has a different design concept in order to maximize the survival efficiency." Sun Jiao shrugged her shoulders, "I was born in 071 shelter, and now I think I'm quite lucky. The design concept there is to regulate personality with fixed procedures. Although life is relatively rigid, it is still happy. Some haven't had much luck. "With that, sun Jiao's beautiful face showed a cruel smile that was not in line with her age.

"I once heard that the design concept of the 070 refuge is to rule people by man, to inspire people to survive by creating a role like a spiritual leader... It can be seen how naive the designers were before the war. It is said that within 10 years after the vault had been lowered, it had developed into hell. After only a few years of justice, the "moral model" forgot the modesty of civilized people and became a tribal chief. Hehe, it is said that he used the authority of the security procedures to absurdly clean up all the men, leaving only women as his cathartic tools... As for the 101 refuge, it is estimated that it is a no man's refuge. "

Shocked by the cruel reality, Jiang Chen swallowed and spit hard. However, for sun Jiao's words, he still some do not understand.

"No shelter? Does no one need refuge? "

"Ha ha, of course, the DNA data of elites from all walks of life are stored. After the number of years of refuge, the embryo culture dish is opened to automatically" produce "those perfect bodies. Then, with the help of virtual reality system, the" memory "of more than ten years can be obtained in a short time. Hehe, I don't know what the meaning of the products coming out of the cultivation tank is. Did the designers before the war realize that these commodities will sell well in the waste soil after the war In sun Jiao's words, there is no concealment of sarcasm. Standing aside as an audience, Jiang Chen could not help but be silent.

Is this the end of civilization...

"here it is." Sun Jiao's short words interrupted Jiang Chen's thinking and led him to the door of a shop.

Online FREE Novels

This is the official acquisition station in the outer market of the sixth block. It is responsible for the evaluation and acquisition of goods needed by the camp. While cans, batteries and the like can be used directly as money in some survivors' camps, that kind of trading rule obviously doesn't apply to prosperity's sixth block. Therefore, at this time, we need a credible organization to promote a unified currency. At the same time, it is more convenient to collect taxes.

As the main energy of high-power equipment, sub crystal has rigid demand for any survivor base. And its easy to carry characteristics, but also meet the necessary characteristics of currency circulation.

Although it is a more profitable option to apply for a shop to sell cans, Jiang Chen, who is not short of money, naturally chose the most convenient way to

sell those expensive cans to the most impartial sixth block official.

In this regard, sun Jiao did not do more dissuasion, it can be seen that she did not want to stay here for too long.

"Things." A mechanical and skilled answer came from the window.

Jiang Chen saw sun Jiao motioning to himself, then took out the backpack behind him and put one of the things inside on the table.

"Hiss..." the trader in the window took a cold breath.

Jiang Chen finally heard a trace of incredible shock from the tone, but also felt the greedy sight of several red fruits printed on his back.

Unnaturally, she shivers. Jiang Chen reluctantly throws sun Jiao a look of inquiry. Sun Jiao smiles, indicating that Jiang Chen doesn't care. After all, no one dares to break the rules here. At least until they leave sixth block, they're absolutely safe.

"Do you have any more, sir?" The voice was a little respectful.

Canned meat... Even the nobles who live in the inner circle eat mostly the meat of mutant cattle and vegetables that are ripened every day. The front desk trader even suspected that there was something wrong with his scanner, because what the screen showed was...

fresh beef. The storage period was 127 days, and the harmful substances were far below the edible threshold. Food quality - perfect!

Meat itself is a luxury, but the fresh beef that this man brings out... Even if it is called a luxury of luxury goods. This kind of thing has basically

disappeared in the last world. The whole earth can't find a fat cow without mutation. Even if it does, it's probably in the far north, where radiation levels are relatively low.

On the sixth block, or the whole piece of waste, most people don't have access to healthy food. Usually, survivors choose to use a nutrient mixture to satisfy their hunger. That kind of thing made from the protein tissue of mutant organisms can't taste good. It can only be said that it can be swallowed.

Every meal can eat "green food", the whole waste soil is probably only Jiang Chen can be so luxurious.

What's more, this guy thinks that canned food is not as good as fresh food...

"there are many more."

"Please go to VIP room for settlement, and there will be special traders to serve you." The front desk trader chuckled at Jiang Chen and quickly went through the formalities for him. In a short time, a good-looking lady came to Jiangchen.

"Dear Sir, please follow me." The female trader smiles mysteriously at Jiang Chen, then turns around and leads them to the VIP room with graceful cat steps. The reason why the transaction is handled in VIP room is also a measure to keep customer information confidential. If you move out a lot of valuable things in the hall, I'm afraid this person will not be able to walk out of the sixth block 100 meters away. Push open the wooden door, a faint fragrance of tea. Classical wooden table and leather sofa, the middle of the tea table is placed with a furnace of incense, the precious purple clay pot tea ware shows a very elegant. As far as this VIP room is concerned, it is quite a bit of a modern teahouse.

"Come in, sir." Standing in front of the door, the beautiful woman trader looked down slightly, and her chest was covered with attractive gullies. Standing aside, Miss Sun Jiao narrowed her eyes and raised a playful smile.

Somehow, the beauty of the trader's eyes made him feel a little hairy, as if to eat him.

But Jiang Chen didn't think much about it, so he walked into the VIP room.

Just as the beauty trader was ready to go in and put the door behind her, sun Jiao walked in as if nothing had happened.

The beautiful trader looked at Sun Jiao slightly surprised and discontented. However, the savage Miss Sun Jiao naturally glared back.

Glancing at Sun Jiao's arrogant chest ware, the beauty trader turned her mouth reluctantly, still keeping a polite smile on her face, and quietly closed the door.

Jiang Chen naturally did not know that this happened in the confrontation between the number of interest.

For more than 100 sub crystal point transactions need to be carried out in the VIP room, on the one hand, it is out of caution, on the other hand, it is out of the "big" cage... VIP room is linked with special services, which is not news in the sixth block.

"Professional" female traders earn tips through special services, while the backstage of the sixth block exchange can get "high praise" from big customers. In a sense, this is a win-win situation.

However, since Miss Sun Jiao is here, the tip of this female trader will be in vain.

After an inventory, the transaction was quickly settled. For 20 cans of perfect quality, the exchange fairly settled the price of each 50 sub crystal. After all, these cans are not just food, even luxury goods. I believe that if you take these cans to those rich people in the inner ring, they can be sold even if the price is doubled.

The so-called rarity is precious.

For this reason, sun Jiao complained many times in Jiang Chen's ear, but Jiang Chen didn't care much. Instead, she secretly felt happy.

How much can a can cost? However, 1 subcrystalline point can quickly charge the transition Bracelet by 10%! So he doesn't have to risk stealing electricity.

Online FREE Novels

It's a good deal to think about. www.onlinefreenovels.com

"Do you know where the VIP room is?" Walking in the market, sun Jiao suddenly said.

"Well? Where do you trade bulk goods? " Jiang Chen Leng Leng Leng, do not understand why she asked this.

"Pooh," Sun Jiao suddenly covered her stomach with a smile, which was very ungracious. "You really don't know."

"I don't think it's interesting." Jiang Chen looks at Sun Jiao in silence.

Sun Jiao, who had laughed enough, suddenly put her lips close to his ears,

with a touch of banter on her face.

"It's a place for special services."

Jiang Chen felt that his ears had been blown, and his scalp felt a burst of comfortable numbness. However, he has long been used to sun Jiao's teasing from time to time. Naturally, he will not jump away with a red face as before, but he has the cheek to show the expression of enjoyment.

"Did you hate me for spoiling your good deeds?" Sun Jiao asked jokingly, "if I stand outside, she may give you a full service. That chick is probably still scolding me for ruining her business

"How can I hate you? I like you better." Jiang Chen also had smile close to sun Jiao's earlobe, revenge blow tone.

"Sun Jiao's face turned red. After all, she was a girl who had just tasted human affairs. Although she always claimed to be her sister, she was no older than Jiang Chen.

Suddenly, sun Jiao's pair of Phoenix eyes narrowed slightly.

"Someone's following."

"Who?" Jiang Chen a Leng, subconsciously want to turn back.

"Don't look back and pretend nothing happened. No one dares to fight here. I have my own way to deal with these mice, my boss. " Sun Jiao smiles and bites Jiang Chen's ear. In other people's eyes, these two people are like a pair of flirting young lovers in general.

Because someone was following them, their next journey naturally

accelerated a lot.

Sun Jiao took Jiang Chen directly to a hospital like place. After he went in, he realized that this was the place where all kinds of vaccines and genetic agents were sold.

After paying a total of 55 sub crystals, the doctor wearing a mask gave Jiang Chen an injection in each arm. One of the injections is the t-vaccine, which is used to prevent zombie bacterial infections. The other is a class C gene enhancer. According to the doctor, its effect can increase muscle strength, reflex nerve and bone strength by 10-25 points. The effect of physical reinforcement will gradually take effect within three days.

There are many useful medicines in the drugstore. Jiang Chen bought some of them selectively. After all, strength is the premise of ensuring wealth. Can't we hide behind Sun Jiao all the time? Although Jiang Chen really wants to be like this. After that, they went to the ammunition store to replenish their ammunition. The Sirius assault rifle used by sun Jiao used C-type batteries as ammunition. To charge the five clips, only one unit of sub crystal was needed.

As for Jiang Chen's pk200 assault rifle, the 7.62mm rifle ammunition used is a little more expensive, and 360 rounds of ammunition cost a total of 4 crystal points. Although sun Jiao's face was painful, Jiang Chen paid directly.

Can for arms, how to think is to earn ah!

Of course, the barbarians here don't understand.

In this waste land, laser weapons are undoubtedly both environmental protection and economic choice, the general short-range laser rifle is enough to adapt to the terrain of most cities. As long as it is not a high-power long-

range laser rifle, the energy consumption is very low. As far as sun Jiao's Sirius is concerned, the effective range is only 400 meters, and the energy of the beam bomb will be greatly reduced after it exceeds 400 meters. However, a C-type battery is enough to supply it to shoot 200 luminescent beams. If you don't have to consider the overheating of the weapon, it can even fire machine guns at close range.

As for kinetic energy weapons, the advantage is that the effective range is long, the bullet power attenuation is not obvious, and it will not be fully immune to the energy shield. As for the standard weapon pk200 assault rifle of PCA, it can be used as a sniper rifle with 8 times mirror. Although this kind of gun is a waste for Jiang Chen to hold, it is undoubtedly the most suitable one for him.

Kinetic energy weapons are many times more reliable than laser weapons. An EMP grenade can break down a laser rifle, but a kinetic rifle can still fire. If there is an accident, sun Jiao will deal with all kinds of faults of laser weapons, but Jiang Chen has nothing but to stare at.

www.onlinefreenovels.com

"Let's stay here tonight." Sun Jiao looked at the gradually setting sun, and carelessly swept the tracker with the residual light.

"But..." Jiang Chen frowned. He felt uneasy about being followed.

"The night is very dangerous," Sun Jiao said faintly, with a cold smile on her face. "But at the same time, it's full of opportunities."

It seems that some people are doomed to have bad luck tonight.

Chapter 8

Tulip Hotel, located at the junction of the outer ring and inner ring, is close to the most prosperous market on the sixth block and the most powerful militia

camp.

The cold. 50 caliber anti-aircraft machine gun on the roof, although a little bit of the luxury decoration, but also showed the strength of the hotel. After all, in this disorderly wasteland, safety is the first.

To be able to set up anti-aircraft machine guns on the top of the building, it is obvious that the backstage here is undoubtedly the official of sixth block.

People who live here are either rich or expensive, so security is the top priority. According to sun Jiao, here, if someone enters your room without permission, you have the right to shoot him directly without asking for any reason.

The reason why I chose to live here is naturally to facilitate the handling of the "tail".

Sitting on the precious leather sofa, Jiang Chen picked up a leaf of orange from the fruit can with a toothpick and put it into his mouth in the sound of swallowing and spitting.

If placed in the past, canned junk food is disdainful to eat, who knows how many sweeteners, preservatives added in it. However, because he has been eating junk food these days, for his own health, Jiang Chen also had to consider taking some vitamins from canned fruit.

"Don't look at me like this, you'll leave some," Jiang Chen rolled his eyes in the face of sun Jiao's red fruit eyes, and raised his chin to the same person who swallows and spits on the ground. "We might as well solve this problem earlier and have dinner together?"

Hu Lei, who was bundled into zongzi and threw on the ground, felt a killing

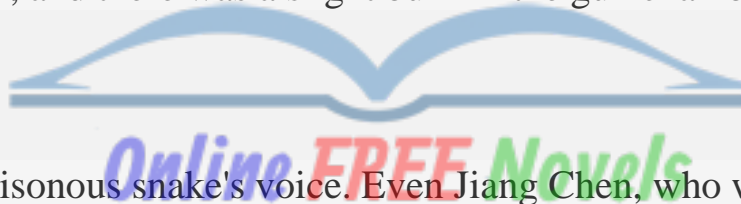

sight coming from behind. He could not help but shiver. Looking at the man sitting on the sofa smiling at him, he felt a trace of fear from the bottom of his heart.

A gun against the back of his head, Hu Lei forehead before the cold sweat constantly dripping.

"I, I really... You must have caught the wrong person! I, I really didn't... "

SUN Jiao took a butt in his face, and then stepped on his head and said fiercely.

"I'm not asking if you've been following, but you," Sun Jiao narrowed her eyes and slowed down her voice. Her index finger gently opened Sirius's charging switch, and there was a slight buzz in the gun chamber. "Who sent you?"

It was like a poisonous snake's voice. Even Jiang Chen, who was sitting on the sofa, could not help shrinking his neck. This was the first time he saw her so domineering. Er, maybe not the first time.

Sun Jiao tied him into zongzi and brought him back. As soon as he woke up, he insisted that he didn't know anything. In addition to his name, he didn't give any useful information. He insisted that he was just a refugee living in a slum.

However, will refugees be here? It's a busy part of sixth block.

"I really don't know anything! You, you are lynching! The sixth block guard won't let you go! " Hu Lei shouts in disorder, eyes wide, and even naively begins to threaten Jiang Chen.

It's naive and stupid.

If it was not for the trust in sun Jiao's ability, Jiang Chen almost believed that he was really an ordinary person.

"You have ten seconds to think about it. Of course, in order to urge you to think of something, I'll blow you an egg every ten seconds Sun Jiao coldly said, at the same time a foot will lie on the ground of Hu Lei kick over.

"No! No Hu Lei, who was turned over, howled like a pig, and looked at Sun Jiao in horror, trying to retreat away from her.

"9"

"I, I really don't know anything! Elder sister, elder sister, please forgive me..." Hu Lei begged desperately, but he could not see a trace of sympathy in the eyes of a demon like woman.

"7" Sun Jiao copied a steel bar without saying a word.

"I, I..."

"1" Sun Jiao raised her hand.

"Ah, ah, ah!"

"Wait a minute." Jiang Chen suddenly opened his mouth.

Sun Jiao smell speech, stopped the action on the hand, but the steel bar in the hand is still hanging in the sky.

A sour smell pervaded the room. Jiang Chen frowned and sniffed. Looking at Hu Lei, who was prone to convulsion, a trace of contempt flashed in his eyes.

It hasn't been done yet. It's all TMD peeing. If you want to learn from others, you'd better die than surrender.

However, when sun Jiao said to break eggs, Jiang Chen's crotch is also a pain, this move for men's lethality is really some terrible.

"I don't really like violent solutions." Jiang Chen bit a toothpick and said with a smile to Hu Lei.

Hu Lei seemed to see the straw to help him, and he crawled to the front of Jiangchen and kowtowed his head desperately.

"Thank you, big brother! I, I really... "

" but if you keep on pretending like this, I don't mind giving my assistant advice, such as pressing a starving mutant dog on your crotch. I think it will have a good time

www.onlinefreenovels.com

Jiang Chen's cold words let Hu Lei's smile solidify on his face and become an ugly expression than crying. When Jiang Chen didn't say this, he naturally shook his legs.

It's his mother's, which makes me ache. Jiang Chen murmured, but there was no performance on his face.

"Of course, I prefer trading to violence. After all, I'm essentially a businessman. If you're willing to cooperate, it's yours. "

A crystal particle emitting Lavender fluorescence was placed in front of Hu Lei. The pair of eyes full of fear gradually turned into greed.

It contains 100 energy points of sub crystal, which is undoubtedly a huge sum of money in this waste soil.

"Of course, you can cheat, for example, to fool me with some fabricated lies. But if I were you, I wouldn't do it. Can your boss give you so much? I can give it to you as long as you work for me later. "

Jiang Chen is very satisfied to see the change of expression on Hu Lei's face. He knows that the strategy of carrot and stick has worked.

The next thing was much easier. Jiang Chen easily got the information he wanted from his mouth.

Huigu mercenary group, mainly engaged in human trafficking and plundering survivors, occasionally provides security services to specific customers. The headquarters of the mercenary regiment was stationed in the experimental primary school in Songjiang, and a relatively stable defense line was set up by using the walls of the primary school. The reason why I have a crush on Jiang Chen is just an accident. It happened that the trading motorcade sent by the Huigu mercenary came to the sixth block for trade. Zhou Guoping, the leader of the team, glimpsed that Jiang Chen took out a can from his backpack, and then watched him be invited into the VIP room. That was greedy.

Of course, Zhou Guoping is not a brainless person who can take on such an important task as team leader of the trade team. It's impossible to start on the sixth block. If the rules are broken, the dead people sprayed with formalin outside the market have already explained the consequences very clearly. Moreover, the Huigu mercenary regiment also needs to exchange necessities through the sixth block. No one dares to offend such forces.

But if you do it outside, it's OK. The sixth block commandment doesn't step

out of that iron gate. That's the rule.

Looking at the bulging backpack behind Jiang Chen and sun Jiao, Zhou Guoping's heart is a burst of fire, but he still left a heart. There are a lot of forces who come to the sixth block to trade. If you kick the iron plate, even the boss may not be able to save him. Zhou Guoping, who knew the depth of the water here, did not rush to make an ambush plan. Instead, he sent a hand to follow the two men. On the one hand, they are afraid of running away; on the other hand, they are exploring the depth of their strength and whether there are any inconvenient forces behind them.

When he saw Jiang Chen get vaccinated first, and then went to the weapons store to replenish bullets and explosives, Zhou Guoping was ecstatic. It seems that these two people are just common loners on the waste soil. If the organization with a little strength will not choose to replace the bullet with sub crystal, they will often have an advanced or simple production line to make these consumables.

Take sixth block, for example, and that huge slum is not used to house waste. Next to the slums alone is the factory, which occupies a quarter of the sixth block. There are production lines seized from various places, and some of them have been improved to adapt to the efficient new energy sub crystal. The waste metal will be remelted into bullets, the protein and fat of mutant organisms will be decomposed into nutrient mixture, and the catalytic vegetables and fruits and other luxury goods will be cultivated through the numerical control tower farmland... If you want to survive on the waste soil, it is absolutely impossible not to resume production. Naturally, the leadership of the sixth block is well aware of this.

As early as ten years ago, the entire Wanghai supermarket has been moved empty.

Since it was determined that the two men were only on their own, Zhou Guoping, on the one hand, began to get in touch with the headquarters of the Huigu mercenary corps, on the other hand, he stepped up his surveillance on the two men. This fat sheep is more than several times fatter than the sheep he has met before. Although that woman makes Zhou Guoping feel a little dangerous, but for the two people's "huge money", he is determined to get it!

After listening to Hu Lei's confession, Jiang Chen touches his chin and falls into meditation.

"Hey, hey, boss. Do you think you should put that, er, that sub crystal..." Hu Lei, with a shy face, said with a smile to Jiang Chen, the focus of his eyes was really full of greedy looking at the crystal.

100 energy points! It's enough for him to eat for a lifetime.

One energy unit of subcrystal can be replaced by 10 nutrient mixtures. Oh no, what else. Ha ha ha... Even if you go to Xinrui Hotel, the most famous gold selling cave in this wasteland, you can spend more than a month! Hu Lei's heart can't restrain ecstasy, although the sub crystal is still pinched in Jiang Chen's hand at the moment.

Since that man still needs me, I won't die, he will give me a lot of benefits. Hu Lei fantasized about a better life in the future, lying in the arms of the blonde maid, drinking...

his small eyes gradually began to focus and met the black muzzle.

"Ah... Idiot." Jiang Chen sighed and pulled the trigger.

Bang!

The blood splashed all over the ground, which was mixed with white dregs. Looking at the smoke from the muzzle of the gun, Jiang Chen's hands trembled slightly.

Although he had made psychological preparations, the dead man was also the one who deserved to die without knowing how many lives there were. But when he saw the skull crack under the muzzle of his gun, his heart was still shaking violently. The reason why Hu Lei didn't say a word just now and insisted that he didn't know anything was not that he was frightened by the forces of the Huigu mercenary group. After all, if he wanted to hide, no one could find him. If you want to arrest an enemy in this wasteland, it's hard to do it even if it's a monster like the sixth block, let alone the gray magic mercenary regiment. As long as he left the area, he didn't need to worry about the pursuit of traitors.

The reason why he did not let go was that human life was too cheap... He was afraid that once he confessed, he would face the end of execution.

But in extreme fear, he heard Jiang Chen's conditions like heaven, he seemed to grasp the straw to shake everything out.

The little minion named Hu Lei thought that he could really make a deal with Jiang Chen and become a spy of Jiangchen in the Huigu mercenary group, and take the opportunity to make a fortune. You're kidding. What the hell is loyalty? There is no absolute loyalty in the waste land. Everyone is crazy to survive, let alone his rogue role...

however, his calculation has failed. At the moment he gave the information, his value was gone.

I'm kidding. What's Jiang Chen's plan for the mercenary regiment? Can it bring him more benefits?

Therefore, it is a wiser choice to directly execute the watcher. Jiang Chen also doesn't have to worry about those people finding themselves.

Naturally, the blood also splashed on Sun Jiao's body. Slightly Leng Leng, sun Jiao did not make too much surprise response, after all, she has seen too much of this degree of blood, just shrugged her shoulders and said.

"I said, it's hard to wash clothes with blood... And, in fact, this kind of thing can be left to me."

The subtle tenderness contained in the following sentence makes Jiang Chen touch slightly.

Taking a deep breath, he calmed down the restlessness caused by the killing. Jiang Chen turned off the insurance and threw the gun aside.

"Get used to it."

Online **FREE** Novels

www.onlinefreenovels.com

Sun Jiao showed a smile on her face, put the gun to one side, crossed the corpse on the ground, and approached Jiang Chen.

Sitting on Jiang Chen's legs, sun Jiao hugged him. This bold action can not help but let Jiang Chen feel some surprise, some commotion. The softness against his chest, with a positive blow, actually directly dispelled the struggle in his heart.

"You'll stay, won't you?"

A pair of slightly dry but delicate red lips, gently spitting heat in his ears.

"You know?" That's the biggest secret of Jiang Chen, and it's also a secret

that can't be said. Embracing the delicate body in front of him, Jiang Chen said with complicated tone.

"Women are very sensitive." Sun Jiao's voice with a smile, "you don't belong here, but... I hope you don't leave me."

"Absolutely not." Jiang Chen's voice is light, but firm.

That decision was made that night.

Yes, at first, Jiang Chen just planned to get a lot of gold from here, and then go back to modern times to live a rich life.

But now, it seems that he can't claim to have nothing to do with the world... Jiang Chen thinks with emotion.

With care, it is impossible to leave as soon as you say. Maybe there is a way to bring sun Jiao to modern times? After all, this place is not for people.

"I believe in you, too."

This sentence, also from the heart.

"I'd love to eat you here if it wasn't too bloody here." Moved and happy into a burning flame in the abdomen, Jiang Chen viciously whispered in sun Jiao's ear.

"Yes, I want to take a bath first."

"But I don't want to let go." Jiang Chen bad smile in that elastic small buttocks patted, content to listen to the ear from the hum.

"Then you hold my sister and I'll go to wash it." revenge bit Jiang Chen's earlobe, and his long and strong thigh clamped his thigh more tightly. Sun Jiao gently vomited the heat with an ambiguous tone. "Just let me see if the genetic agent makes your muscles a little stronger."

A low roar and a cry of surprise.

Shirts, jeans and interiors are scattered on the ground...

luxury water resources splash down, splashing on the smooth tiles. The drops of water, mixed with sweat, slide down in the crashing sound and chanting, sketching out the tracks of * *.

(the word "1W" is omitted below. It is not difficult to imagine a large brain hole.)

Along with a high long sound and a heavy low roar...

panting for breath, Jiang Chen held the hot thigh and slowly put her on the ground.

"It seems that the genetic medicine is not a fake. My feet are hardly touching the ground." For a while, sun Jiaocai breathed heavily from the climax. Laughing, she stretched out her index finger and gently poked at Jiang Chen's chest. Sun Jiao rolled her eyes at Jiang Chen.

The original flat chest has grown out of the chest muscle unconsciously. However, the genetic agents directly strengthen the muscle strength, not the muscle shape, so although Jiang Chen's body does not seem to have much change, both explosive power and endurance are far from the weak modern man before."Satisfied? My princess. " Jiang Chen lightly embraces that slender waist, bad smile wants to pat that makes him cannot put down the

buttocks.

"Sister Ben." Sun Jiao mischievously dodged Jiang Chen's hand, then pulled a bath towel and put it on his body, "it's time to do business."

"Dinner together?" Jiang Chen smiles and takes a bath towel.

"Of course. But before that, we have to deal with the bad guy out there

Looking at Sun Jiao's back as she leaves the bathroom, Jiang Chen feels her nose with a bitter smile.

It's crazy to be ashamed next door to the dead.

Chapter 9

It's not a big deal to deal with. After all, this is not a civilized society.

Sun Jiao just through the pager next to the door called the cleaner, explained met the assassin yunyun and so on, then came several people to carry the corpse on the ground away. Before leaving, the cleaners did not forget to spray blood dissolving agent on the carpet of the living room for Jiang Chen to remove the disgusting stains. Then the lobby manager came to the hotel in person and apologized to the two people for the stalker's intrusion into the hotel.

In the end of life, death is a very common thing.

It seems that this is not the first time that the lobby manager has dealt with this situation, and he is quite skillful.

After rejecting the compensation dinner offered by the lobby manager (beef steak with variant beef), the manager turned and left. The so-called compensation, in fact, is just a courtesy proposal. Few people who can afford to stay in such a hotel will care about a meal of meat.

Because there is no kitchen in this suite, there is only a microwave oven for heating and an electric rice cooker with ash in the dining room. Although the rich people who live in such places generally do not choose to prepare their own food, it does not rule out that the extremely rich local tyrants are used to using luxury goods such as rice.

Yes, rice is a luxury in this era, and even the NC tower farm on sixth block doesn't produce much rice. Most people still take nutrition mixture as staple food, and occasionally eat some cooked food to enjoy life.

But Jiang Chen is obviously the kind of local tyrant.

Take out a small bag of rice from the storage space and pour it into the rice cooker after washing, and add a certain amount of water to the ginseng. In less than half an hour, sun Jiao's eyes lit up with rice.

www.onlinefreenovels.com

Jiang Chen has no taboo in front of sun Jiao to take things out of thin air, sun Jiao also did not ask too much. Jiang Chen can see that she is very curious, and at the same time, she is very grateful for not asking. Jiang Chen believes that one day, he will tell her all the secrets, but not now. Because he can't explain the miracle that happened to him very well, the ambiguity will only make her have some unnecessary misunderstanding.

After the can is poured into the plate, it is heated in the microwave oven. When plates of hot food are put on the table, this not so sumptuous luxury dinner begins.

The reason is that Jiang Chen is really fed up with canned food.

Luxury is because these curry chicken nuggets, Mapo Tofu, bamboo shoots

with shredded pork... In short, the dishes that can't be named are put on the table at the same time, which is the first time Miss Sun Jiao has seen.

The sumptuous dinner was over after some ungodly wolfing.

After touching his flat stomach and glancing at the empty rice cooker, Jiang Chen could not help but wonder.

It seems that the genetic agents not only strengthened his muscles, but also strengthened his stomach bands. This amount of food, at least, is more than twice as much as usual. It seems that sun Jiao's appetite is so large, not only because she is a food.

"I did more to save the rest for tomorrow's breakfast, but you finished all of it." Jiang Chen looked at Sun Jiao's appearance of touching her stomach and said with a smile.

Sun Jiao's face red, fiercely glared at Jiang Chen, "how, afraid?"

"No, I can afford it no matter how much you eat." Chenjiang shook his head.

Although it is not sweet talk, Miss Sun Jiao is very satisfied. I saw this "fierce" elder sister, the corners of her mouth actually showed a happy smile.

"Help me clean it up." Jiang Chen rolled her eyes at Sun Jiao and stood up with her plate.

"OK."

Looking at Sun Jiao's flat stomach, Jiang Chen really can't think of where the five bowls of rice were put.

"The commercial bank building in Qingpu is located in a prosperous area, with high zombie density and radiation value. And... There are dangerous species. "

Lying lazily on the bed, sun Jiao's finger points on the screen of the holographic computer, and a three-dimensional image drawn by green lines will appear.

"This is the map. If we need to get the gold in it, we need to get in from here, and then go through the safe passage. From here... I said, did you listen to me?" Sun Jiao gave Jiang Chen a bad look.

"What is this After swallowing and spitting, Jiang Chen looks at Sun Jiao's high-tech products.

The solid part is only about the size of a pen. The screen is made up of a square light screen projected from the side. Above the screen, there are three-dimensional images made by holographic projection.

www.onlinefreenovels.com

This science fiction film will appear in the product, did not expect to actually see, Jiang Chen some can not believe his eyes.

I'm afraid that the value of this thing has surpassed the gold of Wanghai city.

Of course, it's hard to cash in this world. I'm afraid that as soon as Jiang Chen takes it out, interested departments will come to him and discuss with him about how to contribute to the country.

"Although holographic computers are not as reliable as wrist computers, their performance is much higher. I said... There should be a limit to ignorance. " Sun Jiao gave him a second look, then adjusted some of his sour arms and continued to lie prone."... well, what are the dangerous species?" Jiang Chen

took a look at the back of sun Jiao's head, sighed, acquiesced in his ignorance, and leaned over Sun Jiao's side, staring at the computer screen and asked.

"For example, the guy named meat mountain I met this morning, and this one." Sun Jiao's fingers glided across the screen, and a creature with a shape quite similar to the alien in the movie appeared at the top of the screen. "Dead claw, the energy index of sub crystal is between 60 and 70. The speed is very agile, and the sense of smell is very sensitive. The whole body is covered with high-density horny armor. It is difficult to cause substantial damage to it by kinetic energy bullets. In short, it's better to run directly when you run into this kind of guy, although it's hard to run away generally. "

The faint fragrance of jasmine disturbs Jiang Chen's nose. Because of the shower gel and shampoo brought from modern times, sun Jiao's body exudes a particularly attractive fragrance.

But now is talking about business, Jiang Chen or control himself.

www.onlinefreenovels.com

Convergence of mind, Jiang Chen staring at the dead claw image on the screen asked.

"Is this around the commercial bank building?"

"Dead claws are found in all kinds of places. Generally speaking, they like to live near the center of a nuclear bomb explosion, but occasionally they wander around. I'm not sure if there are, but if not, there are other mutants in places where zombies are more dense. For mutants, zombies are food. "

"Do you have any plans?" Jiang Chen pondered for a moment and then asked.

"Now, of course, there are two options. One is to directly invade the

underground vault through this route, and then place explosives for blasting. Second, through this route to the main control room, hacked into the host to obtain access, and then according to the normal way to open the vault password lock access

"I said... Where on earth did you get this information? Is it reliable?" Looking at the clear and concise route on the holographic map, Jiang Chen couldn't help but move slightly.

"Liuding town has the most complete map database. It is said that it was downloaded from satellite shortly before the war. Naturally, there will be no problem."

"What exactly is Liuding town? I always hear you talk about it." Hearing sun Jiao's explanation, Jiang Chen can't help but wonder what Liuding town is.

"Bohai, an aircraft carrier." No matter the surprised expression on Jiang Chen's face, sun Jiao turned back and blinked playfully, and continued to say, "well, my boss, are you supposed to make a choice?"

"... plan one is too dangerous. The explosion of the vault must have caused a lot of noise. If all the zombies in the street were brought in, we would not be able to escape."

"This is also my idea. Although the zombies in the whole street are exaggerated, the zombies of the whole building will surely swarm to me." Sun Jiao shrugged her shoulders.

Zombies, even in the daytime, can't be said to be totally offensive. If they are strongly stimulated, the zombies will still attack.

"By hackers? Would you hack into the mainframe

"How can I do that?" Sun Jiao chuckled and said, "to survive in this last world, good shooting is enough. However, there are a lot of such talents, and their living conditions are often not very good, and it will not cost much to hire one. "

"Let's choose option two. Where can we hire people in this area?" After pondering for a moment, Jiang Chen made a choice carefully.

"That's fine. It's a slum on sixth block. People who don't know how to fight live there." Sun Jiao angrily nuzzled out of the window, turned off the holographic computer, and lay lazily on the bed, "by the way, don't you really have to worry about the gray Gu mercenary group? Although they are active in the Songjiang area, we killed their people after all... And in their eyes, you are a fat sheep. "

"... that's what you say," Jiang Chen touched his chin. "I have a hunch that they will choose to start when we leave the station, or follow us to look for flaws."

"Do you want me to go out and get ready?" Sun Jiao sighed and stretched her slender arm.

"Most of all, we can do this..."

after hearing about Jiang Chen's plan, sun Jiao's eyes brightened.

"Yes, it's worse than me... Then you can go to the talent market by yourself tomorrow, right at the front door of the slum. The Commission is usually 1 sub crystal, and they will help you to choose what you are satisfied with."

"Well, it's better to split up. When you leave, you should be more hidden."

Jiang Chen admonished cautiously.

"I understand," Sun Jiao waved her hand with indifference. "I've offended a lot of people, just a mercenary regiment. If I didn't worry about you, I would like to go, and no one can stop me."

I promise, if I want to go, no one can make complaints about it.

Press the switch of bedside chandelier casually, the light of warm color in bedroom is dark. The night is very deep, through the window coated bulletproof glass, can no longer see the street pedestrians.

"Oh, go straight to sleep?" Sun Jiao turns over and hugs the quilt in front of her chest and looks at Jiang Chen with a smile.

"You goblin... You're going to do business tomorrow. Go to sleep." There was a big fight just now.

If you play like this every day, Jiang Chen's body is really a bit too much to eat.

Chapter 10

"Hey, boss Jiang, are you satisfied with this?"

The weather on the waste soil is very strange. It is summer, but occasionally it will be as cold as the end of autumn. Dense radioactive dust blocks most of the ultraviolet radiation, making climate anomalies a normal in the world. If the cloud like radioactive dust does not drift away, the temperature here will even be a little colder.

Especially in the morning, this chill is particularly obvious.

Wearing a windbreaker, Jiang Chen put one hand in his pocket and scanned with a resume in the other hand. Standing on the side of the fat man has already Xie Ding, age seems to be enough to be Jiang Chen's father, but now he bows and bows to him.

The core of capitalism is freedom. Although I don't know what Jiang Chen came from, if he offends the customers, the boss will never let him have a hard time.

Besides, Jiang Chen is a man of status.

At Sun Jiao's suggestion, Jiang Chen made up a fictional identity for himself - General Manager of fish bone can production company. In this wasteland, apart from the leaders of various forces, two kinds of people have the most status. One is an arms dealer, the other is a food producer.

These two things are profiteering, after all, most of the soil can no longer be cultivated.

The watermark features a blue double-arched shape above the text "Online FREE Novels". "Online" is in blue, "FREE" is in red, and "Novels" is in green. Below this, the website URL "www.onlinefreenovels.com" is written in a smaller, light blue font.

As for why the company is called "fish bone", it is naturally because of its convenience. Most of the cans Jiang Chen brought are fish bones. He even began to consider whether to buy the fish bone Canned Food Co., Ltd. after getting a sum of money. This also saves the trouble of having to erase the production date with sandpaper every time...

"... Zhang Tianyu, former vice president of Walker Technology Co., Ltd., is proficient in economic management and electronic product R & D planning, and once led the research and development of Walker P7 mobile phone which is popular in Asia..." Jiang Chen grinned, vice president? Ironically, "cough. I said, Mr. Wang Yi. What I need is computer talents and some physical work. Can you find me a deputy general manager

It's a pity, but the general manager has been dismissed. He doesn't need any enterprise strategy, business plan and so on.

I do not know why, brush off the so-called general manager's feeling really TMD happy... Of course, Jiang Chen's face did not show any performance.

"I'm sorry, I'm sorry, please wait a moment!" Wang Yi, the manager of the talent market, nodded and grinned, then turned and ran into the reference room to continue to select.

With a sigh, Jiang Chen looked at the ragged people in the slums.

There are also many families. Young men with labor force and even women who are in good health will enter the industrial zone to engage in production, and then exchange for a few cheap nutrition mixture and a small iodine tablet, and survive with their families or alone.

If you have a disease...

Jiang Chen looks at the radiation clouds in the sky. The sunlight and color through it are so unhealthy.

Soon, fat Wang Yi ran out of the reference room, took a stack of information and handed it to Jiang Chen's hand. Then he wiped the sweat on his head with a smile.

These resumes have fallen some dust, you can see the marks just wiped. There is no shortage of high-tech talents in this waste land, even can be described as surplus. After all, it doesn't take high-end technology to produce bullets, and no one will pay for a new computer or a new mobile phone.

Jiang Chen carefully selected the materials in his hands and frowned from time to time.

"Boss Jiang, are you... Not satisfied?" Wang Yi asked cautiously. After all, this is related to his commission and his only job.

"There are a few people whose skills are really nothing to be picky about, but..." Jiang Chen pointed to a column under his resume, which said, "Why are all the criminals you picked for me?"

Lu Haitao, an IT worker, was sentenced to 10 years in prison for stealing 15 nutrient mixtures and engaged in manual labor in an organic synthesis furnace.

Li Kaiming, former project manager of Feixun Technology Co., Ltd., was sentenced to 17 years' imprisonment for holding a gun and engaged in manual labor in a bullet processing factory.

...

the fat on Wang Yi's face was squeezed together, showing a bitter smile that was even worse than crying, and said in an almost imploring tone.

"I said boss Jiang, well, I can't help it!"

After listening to Wang Yi's explanation, Jiang Chen understood.

It turns out that not all the refugees in the slums have freedom. Naturally, those who have lost their freedom can be traded as commodities. Everyone who had received subsistence allowances in the slums was nominally the "property" of the sixth block, and their identity was somewhat similar to that of serfs in the old society. Everyone who has the ability to work will be forced to enter the factory to work. Those who do not have the ability to work will be reserved as the population base, and will be used as cannon fodder in the front line when necessary. As for those who are free, most of them are poor, but they are more or less able to support themselves, and naturally they do not have to receive any subsistence allowances.

However, these are the rules of ten years ago. Now Wanghai city has formed a stable "ecosystem", and alien species and zombies will not impact the living space of survivors for no reason. With no foreign invasion on the sixth block, the demand for serf like refugees has been greatly reduced. In order to absorb the surplus population, sixth block officials have to participate in the population business.

Provide the necessary "relationship" to the established "agents" and then sell the surplus refugees in the slums through their hands. These refugees are often bought away by mercenaries or caravans as bait to detect danger or lure prey. It can be said that those who have been bought will have a bad ending.

No one wastes nutrients to feed waste.

As a result, those who are allowed to sell are usually criminals who have committed crimes except those who have no labor force and have no value.

Jiang Chen began to be a little confused. He didn't want these two kinds of people.

Bad character is not easy to control, weak and difficult to raise.

"In fact, boss Jiang doesn't have to worry. Those people will wear electronic collars when they sell them. If they do something harmful to your safety, hey, hey," Wang Pang Tzu seems to see through Jiang Chen's worries and carefully explains to Jiang Chen. Finally, he reaches out his finger and makes a flower gesture.

In this case... I'm still worried, but there's no better way. Jiang Chen sighed, ready to choose one of these criminals who can see through.

Just be careful.

"010342, please stop, or you will be killed." The cold voice came from the door, and Jiang Chen could not help but look sideways.

Soft impact from the leg, Jiang Chen Leng Leng Leng, look down.

"I'm sorry to have overheard your conversation. I know computer. Please buy me." The girl's speech speed is very fast, the pupil changes the look of fear and entreaty.

By this small body holding the thigh, Jiang Chen is a little alert to touch the weapon behind. However, when he saw the soldiers in combat uniform indicating not to be excited and aimed at the girl, Jiang Chen gave up the idea of taking out the gun.

The soldier pulled the thin little girl away with the chicken. Jiang Chen's eyebrows wrinkled, but he didn't say anything more.

www.onlinefreenovels.com

Although sympathetic, he was more worried about the girl's attempt.

What if it's the plot of the Huigu mercenary regiment?

"Oh, I'm really sorry. There are always those guys in the slums who rush to reincarnate." Wang Yi quickly bows down to Jiang Chen to apologize, and signals the soldiers to quickly take the girl back to the camp.

Jiang Chen noticed that there was something like a watch on the girl's wrist, which was flashing red at the moment. As soon as a "slave" who has received a minimum living allowance has left the slum, this alarm will be activated to instruct the soldiers on duty to take back the person.

"What if she was caught back?" Jiang Chen asked casually.

"Incorporated into the reform through labor camp." Wang Yi shrugged his shoulders, such things happen every day, he has already seen nothing strange.

"Such a young child can work as well?"

"In fact, it's not small. Generally, they only wear the bracelet when they are over 16 years old. That guy is just stunted," Wang Yi smiles. "Don't say that, boss Jiang, do you want to choose..."

"just take that girl." Jiang Chen sighed.

If such a thin girl enters the reform through labor camp, she will die under high-intensity labor in a few days. But in any case, it was impossible to watch a little girl go to hell.

What's more, the girl seems to be because I... Jiang Chen convinced himself in his heart.

Maybe this is conscience? A luxury.

"Well?" Wang Yi Leng Leng Leng, face strange looking at Jiang Chen, at the same time close to come over.

"Hey, boss Jiang, if you have a good bite, there are actually more good choices. Hey, I have some ways to get you more..."

"you have a lot of words."

Wang Yi shivered when he saw the cold expression on Jiang Chen's face.

"Yes, yes, no problem." It's unnecessary to offend the gold Lord. Wang Yi quickly nods and bows.

"How long does it take to complete the formalities?" Jiang Chen is too lazy to talk to this man.

"About one day, please tell me your address..." although the girl has just committed a felony of restricting her exit from the country, she has become a criminal, and in theory is within the scope of permission to sell. But after all, there has not been a program, and it is not so easy to get it directly.

"Two subcrystals. I'll wait here."

"Boss Jiang, after all, this judicial procedure..."

"three sub crystals, I mean tips." Jiang Chen said impatiently. Why are there so many problems? Civilization doesn't exist. You and I talk about the law?

"Yes! I'll help you do it right away!" Wang Yi ran back to the reference room. He needed to get in touch with his "relationship" immediately.

Although this fat man looks sloppy, he is very efficient. Of course, this is all for the sake of sub crystal.

Jiang Chen only waited for half an hour when he saw a soldier pressing the girl back to the gate. Only half an hour later, Jiang Chen noticed that the girl's face had a dark green.

Wang Yi noticed that Jiang Chen's face was a little unnatural, so he leaned forward again.

"Hey, boss Jiang, the physical examination took some time. It is also for your

safety. Please understand it." With a bitter smile, Wang Yi approached Jiang Chen and whispered in his ear, "don't worry, the quarantine personnel told me. It's still an original product, hehe. "

Jiang Chen slightly deviated his head, this guy is just like a moving heat source, and his body is emitting a bad smell.

Transfer fees and tips a total of 5 sub crystal patted on the table at the same time, Jiang Chen signed his name on the agreement. Since then, this 010342 girl has no connection with sixth block.

"What's your name?" Jiang Chen looked at the bruise on the girl's left face and the bloodstain on her arm. She moved her eyes slightly and sighed.

The bruise should have been hit by the butt of the gun. Although the scar has nothing to do with him, he still has some self reproach in his heart.

"Yao Jiayu." The girl was very obedient and timid to reply, but the voice is because of timidity and appear a little stiff.

"Do you know computers?"

"I will!" The girl suddenly raised the volume, but seemed to realize her abruptness, so she lowered her head and whispered, "computer, I got a B rating in the virtual education system. Whether it's programming or shocking, I'm confident that I can do it well. "

"Oh? Why are you still so down and out? " Jiang Chen was slightly surprised and looked at the little loli. If you can do this at the age of sixteen or seventeen, it's no surprise that in this world, even if you're called a genius.

However, this seems to be a very common thing in the last days. The

introduction of the virtual education system to eliminate redundant quality education, according to each person's talent to provide professional teaching. It takes just a few years in a Petri dish to achieve outstanding results in a certain field. Almost anyone who grew up in a shelter has received a similar education. It's a good level to get B's evaluation.

It's obvious that the reason why Yao Jiayu came here is that he came from a shelter.

This situation is very common, when the resources of the shelter are exhausted, the people inside will often choose to leave and go to find a new home. Most people will choose to enter such a survivor base.

"A lot of people in the slums can do it." Yao Jiayu's face was slightly red, and he lowered his head with some guilty heart, but as if he was worried about Jiang Chen's dissatisfaction, he summoned up his courage and raised his head.

"Although my ability is not necessarily the best, but my potential will never let you suffer... Also, I am very obedient... No matter what you want me to do, I will not resist, and I will be very docile..."

in the end, I don't know whether it is because of excitement or shyness that the girl's face turns red.

Looking at Yao Jiayu trying to sell himself, Jiang Chen can't help but smile.

He didn't care about the little bit of subcrystalline that was spent. It's like money, it's always going to cost.

"Take it easy. You don't have to be so nervous about working for me."

Looking at Yao Jiayu shivering and nodding, Jiang Chen suddenly realized the clothes on her body.

The thin material is tightly attached to her weak body, as if all the people in the slum wear this kind of one-piece clothes. When she left the camp, all her "assets" were confiscated, including the worn-out jacket.

"Cold?"

The girl shivered and shook her head.

At this time, Jiang Chen realized that the girl did not tremble because she was afraid of him, but because the weather was really cold.

With a sigh, Jiang Chen puts the windbreaker on her shoulder in Yao Jiayu's surprised eyes.

"Don't catch a cold. It's not easy to cure here."

Jiang Chen would not say anything warm, but the girl really lowered her head in silence, and a happy smile appeared on her lips covered by scattered and greasy hair.

"... very lucky."

"Well?" Jiang Chen deviated his head.

"No, nothing."

Smell speech, Jiang Chen smile, also did not ask. When he has done a good deed, he is more or less at ease, which is perhaps the characteristic of the so-called civilized man.

Yao Jiayu stealthily looks at the corner of the mouth raised by Jiang Chen, then lowers his head timidly and covers the collar of the windbreaker.

It's so warm...

what she didn't say was that she had been waiting too long. Every day, she would hide in the corner of the slum talent market, secretly observing the people who came to "buy" slaves. She wants to get out of here, waiting for a "not too bad" buyer

there are ferocious mercenaries, well-dressed businessmen, and seemingly inexperienced people.

But she didn't do it once as she does today. Why?

Why risk death and rush out to beg this man?

Perhaps from his eyes to the slums, he saw a touch of special feelings.

It's a feeling called pity. Although it's very thin, it's almost flattened...

if you don't gamble at this time, you'll have to spend your whole life in this hell. She knew that the reason why the villains in the slums had not dealt with her was that she had no physical development at all. As soon as she grew up, she had learned from her neighbor's big sister what the hell she was going to face.

Forced to trade your body for a pack of cigarettes? Or being insulted by a group of people? ...

the father who tried his best to protect his mother, and the mother who

begged to kneel on the ground, witnessed too many tragedies of her, far more mature than she seemed.

The world has gone mad.

Since it is ultimately to be plundered by others and live by others, it is better to choose a person who may treat himself a little better. Not to mention being kind to... She would be satisfied if she could play a little light.

As for losing the bet, if Jiang Chen didn't have the heart to buy her...

the result of her death in the reform through labor camp is not too bad.
